

Markdown Parity Test

A kitchen-sink note to verify mobile renders every feature like the desktop. Compare side-by-side.

1. Headings

Heading 2

Heading 3

Heading 4

Heading 5

Heading 6

2. Inline formatting

Normal text with **bold**, *italic*, ***bold italic***, ~~strikethrough~~, and `inline code`.

A link to [OpenAI](#) and a bare autolink <https://calm.app> should both be tappable.

Here is **highlighted text** in the middle of a sentence.

3. Inline code colour swatches

These should show a colour chip before the value: ● #7c6af7, ● #ef4444, ● rgb(62, 207, 142), and ● hsl(210, 80%, 60%). This one is plain code with no swatch: `const x = 42`.

4. Lists

Unordered:

- First bullet
- Second bullet
 - Nested bullet
 - Another nested
- Third bullet

Ordered:

1. Step one
2. Step two
3. Step three

5. Task list (interactive)

Tap these — they should toggle and persist:

- ☒ Completed task
- ☐ Pending task
- ☒ Another done one
- ☐ Buy milk
- ☐ Ship the mobile app

6. Blockquote

This is a plain blockquote.
It can span multiple lines.

7. Callouts

This is a note callout

Callouts get a coloured left border and a title.

Careful

This is a warning callout.

Pro tip

Tips render in green.

Danger

Something risky here.

8. Code blocks (syntax highlighting)

TypeScript:

```
interface User {
  id: string;
  name: string;
  age: number;
}

function greet(user: User): string {
  const prefix = "Hello";
  return `${prefix}, ${user.name}!`; // template literal
}
```

Python:

```
def fibonacci(n: int) -> list[int]:
    seq = [0, 1]
    while len(seq) < n:
        seq.append(seq[-1] + seq[-2])
    return seq # returns the sequence

print(fibonacci(10))
```

JSON:

```
{
  "name": "cairn",
  "version": "2.3.6",
  "offline": true,
  "features": ["notes", "board", "chat"]
}
```

Plain (no language):

```
just some
plain text
no highlighting
```

9. Tables

Feature	Desktop	Mobile
Headings	Yes	Yes
Code highlight	Yes	Yes
Math	Yes	Yes
Mermaid	Yes	Yes

10. Math (KaTeX)

Inline math: the mass-energy equivalence is $E = mc^2$ and the quadratic root is $x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$.

Display math:

```
</source>
```

$$\int_0^\infty e^{-x^2} dx = \frac{\sqrt{\pi}}{2}$$

$\int_0^\infty e^{-x^2} dx = \frac{\sqrt{\pi}}{2}$

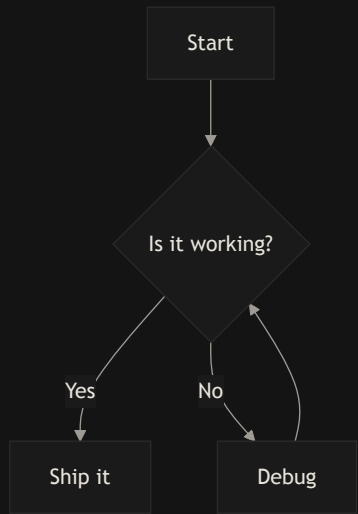

```
</source>
```

$$\sum_{n=1}^\infty \frac{1}{n^2} = \frac{\pi^2}{6}$$

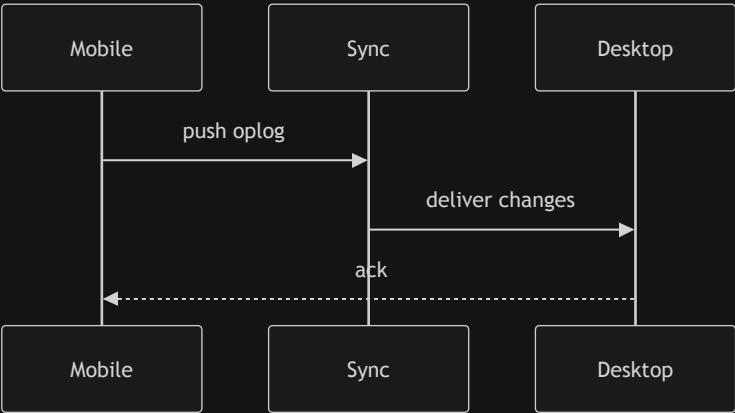

$\sum_{n=1}^\infty \frac{1}{n^2} = \frac{\pi^2}{6}$

11. Mermaid diagrams

Flowchart:

Sequence diagram:

12. Wikilinks

A link to another note: [🔗Feature Matrix ↗](#) (tap to navigate; dimmed if unresolved).

13. Horizontal rule

Above the line.

Below the line.

14. Mixed / edge cases

A paragraph with `code`, **bold**, a $\pi\pi$ inline math, and a highlight all together to make sure inline elements coexist.

- ☒ Task with **bold** and `code` and $a^2 + b^2 = c^2$ inline
- ☐ Task with a [link](#)

That's everything. If any block above looks different from desktop, note which section number.
